Dualit 10L Hotpot Soup Kettle

Simple yet stylish, the 10L Soup Kettle has been designed for safety, ease of use and maximum economy. A highly efficient, long-life heating element keeps the contents safely and consistently at serving temperature ready for dishing throughout the day, freeing up space on your kitchen stove. In addition, the heating element is coupled to a seperate "overheat" thermostat for maximum safety.

Ultimate temperature control

The 400w heating element ensures the desired temperature is soon achieved and with the kettle's variable simmerstat, precisely controlled. The Soup Kettle has 12 temperature settings, with levels 1 to 8 being the optimum for maintaining the temperature of the contents inside.

Not just for soup

Dualit's Soup Kettle can also be used to warm stews, chilli, sauces, gravies, curries and even hot drinks such as mulled wine or hot chocolate. Ideal for high street cafes to hotels to work's canteens and could also be used for event catering.

Easy to clean

The hard wearing, cast aluminium outer body can be wiped clean easily. The stainless steel liner and hinged lid can be machine washed, saving you time on cleaning.
