TURBOCHEFTM

BUILT FOR SPEED THROUGHPUT VERSATILITY VENTLESS

Since 1991, TurboChef Technologies, Inc. has pioneered the world of rapid cooking. With innovation and top performance in mind, TurboChef has redefined cooking efficiency by designing rapid-cook ovens that are versatile, user-friendly, and save energy. TurboChef ovens cook faster and produce consistent results without compromising quality.

Unparalleled Service and Culinary Support

Implementing a TurboChef oven into your foodservice operation would be incomplete without exceptional support. From global, factory-trained technical support to a culinary team that can help you discover all the benefits of rapid cooking, we've got you covered.

Technical and Customer Support

Complete customer satisfaction is the basis for our success, and we are committed to provide only the best service and support. Our service network is available seven days a week and includes 335 customer service organizations and over 4,000 service technicians. As a manufacturer, we understand that training, support, and coaching are vital to providing the best customer service in the industry. Our global training classes educate service agents about our technology and sharpen their troubleshooting skills. This means no matter where your restaurant is located, there is always a TurboChef expert nearby.

Ventless Support

Need help with a ventless installation? We have installed over 230,000 ventless cooking applications worldwide. Visit www.turbochef.com/ventless for resources that can support your ventless installation and help you eliminate the need for costly and wasteful extraction hood systems.

Culinary Experts

With the help of TurboChef Culinary, you truly get the most out of your oven. Our culinary staff is available to help with any cooking questions you may have. You can schedule a full demonstration for any of our products, or work one-on-one to develop optimized cook settings for your specific menu needs. TurboChef Culinary can help ensure your products are consistently delicious, no matter who is doing the cooking!

Consumables and Accessories

TurboChef offers a variety of items that are necessary for the proper maintenance and operation of your oven, as well as products that help facilitate a specific or desired cook effect.

WHAT IS RAPID COOKING?

TurboChef ovens feature a combination of two or more heat transfer mechanisms, such as air impingement, microwave, and/or convection, which reduce cook times without compromising quality.

AIR IMPINGEMENT

MICROWAVE

CONVECTION

TURBOCHEF™

WHAT MAKES IT VENTLESS?

TurboChef ventless ovens have internal systems for eliminating grease-laden vapor prior to the grease escaping the oven; therefore, the ovens are certified as non-grease emitting appliances.

UL®-CERTIFIED VENTLESS

VENTLESS RAPID COOK OVENS

TurboChef rapid cook ovens utilize top and/or bottom air impingement assisted by precise bursts of microwave to decrease cook times by more than 80% without compromising quality.

Number of Pepperoni Pizzas Cooked	214	131	222
UL/EPA/NFPA/ICC Results	1.04 mg/m ³	0.52 mg/m ³	0.48 mg/m ³
Ventless Requirement	<5.00 mg/m ³	<5.00 mg/m ³	<5.00 mg/m ³

Energy Output and HVAC Requirements

Total Average Power (Environmental Load)	4,846 W	2,651W	1,921 W
Average Cooling Requirement	1.15 Tons of AC	0.75 Tons of AC	0.55 Tons of AC

HhC 1618

Cooks up to 35 12" Pizzas per Hour

Cooks 40-50% faster than traditional conveyors

Space-saving footprint, 16-inch belt width

Idle mode for energy conservation

Easy to use: up to eight customizable cooking profiles via manual entry or smart card and no restrictive finger plates

Left or right feed conveyor belt direction via software

Mono-finger design evenly distributes air at a higher velocity for more uniform baking and increased menu offerings

Easy to clean

Operates at temperatures up to 600°F (316°C)

Bake time range from 30 seconds to 15 minutes

Stackable design up to three high (requires stacking kit)

Configurable for UL®-KNLZ approved operation without a ventilation hood*

Business & Industry Convenience Stores Hotels & Resorts Quick Service Restaurants Theaters

COOK TIMES

Toasted Italian Sandwich	60 sec
Flatbread Pizza	1 min 15 sec
French Fries	2 min

HhC 2020

Cooks up to 60 12" Pizzas per Hour

Cooks 40-50% faster than traditional conveyors

Throughput exceeding 28-inch conveyors in a compact 20-inch design

Idle mode for energy conservation

Optional split belt (50/50, 65/35, or 70/30) allows chefs to cook multiple menu items at the same time

Easy to use: up to eight customizable cooking profiles via manual entry or smart card and no restrictive finger plates

Fits a full-size sheet pan

Left or right feed conveyor belt direction via software

Mono-finger design evenly distributes air at a higher velocity for more uniform baking and increased menu offerings

Easy to clean

Operates at temperatures up to 600°F (316°C)

Bake time range from 30 seconds to 15 minutes

Stackable design up to three high (requires stacking kit)

Configurable for UL®-KNLZ approved operation without a ventilation hood*

Middleby Connect™

Middleby Connect™ is more than just another piece of WiFi-compatible kitchen equipment. It is a robust enterprise system for developing recipes, updating your oven settings, interpreting oven data, and much more. Middleby Connect™ also enables predictive servicing and maintenance of ovens. It is available for the Double Batch, Single Batch, Bullet, Eco*, i1 (Sōta, Panini, Waterless Steamer), i3, and i5 ovens with Touch Controls, as well as other Middleby brand equipment.

Develop recipes, create menus, and download updates to your ovens, all from one application

Event logging provides instant point of sale and diagnostic data

Receive email alerts for important oven events and fault conditions

Predictive maintenance diagnostics and dashboards for oven parts and consumables

Proactive servicing of ovens made possible by configurable email notifications

Add/manage users and set user permissions

Data encrypted, securely stored, and protected based on controls outlined in ISO/IEC 20922 and X.509 certificates used for encryption via TLS and server identification

Cost of service and data storage included with oven for the first year

Customizable/compatible with customer-specific Cloud services†

Connectivity Options*

TurboChef ovens with Touch Controls are Wi-Fi ready for the connected kitchen. Cellular options are also available to suit your needs.†

* Connectivity option must be specified when ordering oven. Additional fees may apply for Wi-Fi and cellular devices and services.
† Additional lead times and fees may apply.

PREDICTIVE MAINTENANCE

Predictive maintenance diagnostics and dashboards for oven parts and consumables

MANAGE OVEN RECIPE SETTINGS

Develop recipes, create menus, and download updates to your ovens, all from one application

PROACTIVE SERVICING

Proactive servicing of ovens, made possible by configurable email notifications

LIVE MONITORING OF OVENS

Event logging provides instant point of sale and diagnostic data

Patented Technology for Ventless Operation

TurboChef ventless ovens have internal systems for eliminating grease laden vapor prior to the grease escaping the oven; therefore, the ovens are certified as non-grease emitting appliances. When following our recommendations, TurboChef ovens can be installed without the aid of a Type I or Type II hood per International Mechanical Code (2006, 2009, and 2012), NFPA 96, NFPA 101 (Life Safety Code), EPA 202, and Underwriter's Laboratory (UL® KNLZ).

Certifications

Safety – cULus, TUV (CE)
Sanitation – NSF*, UL EPH*
Ventless – UL® KNLZ

How the Ovens are Tested

TurboChef ovens are evaluated according to UL®. The evaluation entails placing the test oven in an environmental chamber built to capture all emissions escaping during idle, cooking, and door-open conditions. During the eight-hour test period, a typical worst-case food item is cooked continually, and 100% of condensable and non-condensable emissions from the product are collected and analyzed according to the EPA 202 Test Method. At the conclusion of the test, the total concentration of particulate matter (emissions) must be less than 5.0 mg/m³ for the oven to be certified for ventless operation. Cooking devices that measure above the 5.0 mg/m³ threshold are considered to produce grease and must be installed under Type I ventilation, according to International Mechanical Code.

TurboChef ovens are well below the 5.0 mg/m³ threshold.

Menu Requirements

TurboChef ovens have been approved by Underwriter's Laboratory for ventless operation (UL® KNLZ listing) for all food items except for foods classified as "fatty raw proteins." Such foods include bone-in, skin-on chicken, raw hamburger meat, raw bacon, raw sausage, steaks, etc.

The TurboChef certification includes precooked food items such as pizza toppings, sandwich meats, frozen appetizers, and cheeses. Additionally, raw, lean meats such as boneless, skinless chicken breasts and fish fall within the certification.

Submittal Recommendations*

1. Determine which agency requires notification, i.e., health, building, or both.
2. Submit the appropriate package for your oven type. Submittal packages can be located at www.turbochef.com/ventless.
3. Include the following items:
 - a. HVAC analysis demonstrating adequate cooling exists to offset the oven's load.
 - b. Your menu, as ventless operation is not supported when cooking fatty raw proteins.

If you are unsure of your food type, require further assistance, or your request is rejected by local authorities and/or jurisdictions, email us at ventless.help@turbochef.com.

* Ultimate ventless allowance is dependent upon AHJ approval, as some jurisdictions may not recognize the UL® certification or application.
† The HhC 2620, HhC 2020, and HhC 1618 ovens may require installation of additional fire suppression equipment at the discretion of local authorities or jurisdictions.
