

PTFE Sheet and Clip for Roband Grill Stations

We recognise how hard our Roband Grill Stations work and that our customers put our machines through their paces each and every day. That's why we've designed and developed an easy way for our customers to keep their Roband Grill Stations clean and presentable at all times.

Roband Australia is delighted to release a simple and effective non-stick (PTFE) sheet and clip mechanism that is reusable and economical. The non-stick sheet and clip will help to keep our machines in a clean, well-presented condition, will help prevent food sticking during the cooking process and also prevents spillage baking-on or carbonising on the plates over time.

Feedback has shown that the use of the PTFE sheet produces a more flavourful result with thick products such as focaccia being heated throughout whilst the bread is perfectly browned. The PTFE sheet in fact helps to minimise the risk of burning the outer part of the food being grilled whilst it's being cooked.

There are two sizes of clips available, one for the 6 slice Grill Station and a larger size for the 8 slice machine. The non-stick PTFE sheets, which are reusable but are expected to experience wear and tear over time, are available in packs of 5 and 10. Again, there are two sizes available and each sheet is sized to fit neatly across the Roband Grill Station top and bottom plate.

In addition to the clips holding our customised PTFE non-stick sheets in place, it is also possible for customers to cut and use their own baking paper or aluminium foil with the clips. This may be useful or practical where foods may need to be cooked separately for any reason, such as for Halal.

The model information for the Retainer Clip and Non-stick Sheets are detailed in the table below.

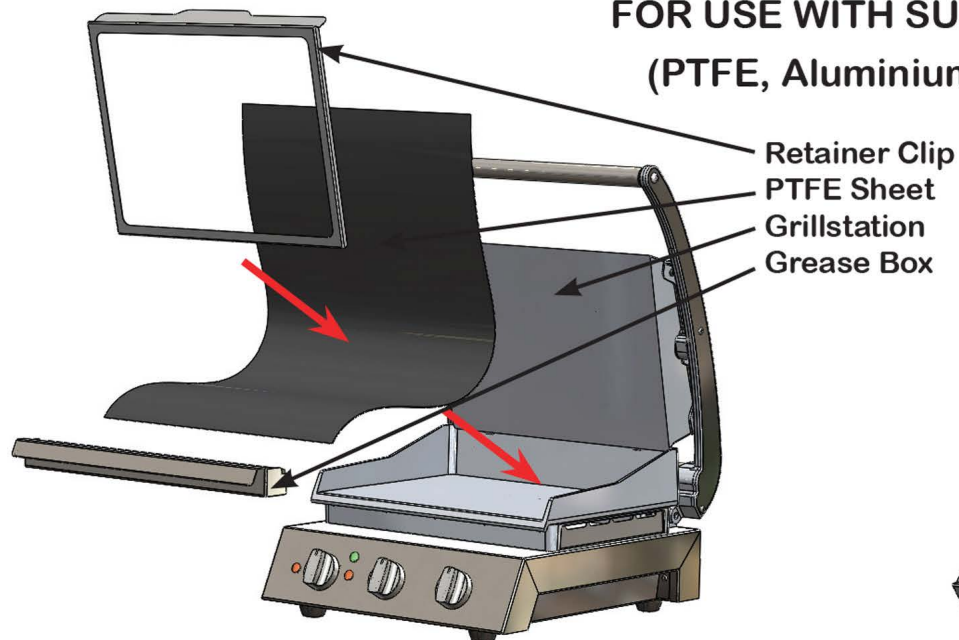

The clip and sheet system is easy to install and each box of sheets includes an installation instruction.

Grill Station Models	Retainer Clip Model Number	PTFE (non-stick) sheet Model Number
GSA610	RC6	PGS605 (5 pack QTY) PGS610 (10 pack QTY)
GSA810 / GSA815	RC8	PGS805 (5 pack QTY) PGS810 (10 pack QTY)

SHEET RETAINER CLIP - GRILL STATION

FOR USE WITH SUITABLE LINER SHEET

(PTFE, Aluminium foil, Baking Paper)

GrillStation Model	Retainer Clip	PTFE SHEET
GSA610	RC6	PGS605 (Qty5) PGS610 (Qty10)
GSA810 GSA815	RC8	PGS805 (Qty5) PGS810 (Qty10)

TO ATTACH SHEET:

1. Rest Sheet on open plates as shown and position Retainer Clip in place.
2. Rest the clip against the lower part of Top Plate and slide upwards to engage the bottom hook.
3. Rotate clip towards the plate. Gripping the plate and clip between thumb and fingers, press to "Snap" the clip into place.
4. Position End of Sheet under greasebox and replace the greasebox.
